

ENHANCE THE STUDENT LEARNING EXPERIENCE

At Panopto, transforming the way people learn and communicate is our passion. We're a software company enhancing the learning process and improving student achievement at over 400 leading academic institutions worldwide, including Duke University, Newcastle University, American University in Cairo, and the University of Waikato. These institutions recognize that a competitive technological and pedagogical edge is critical in higher education today, and have chosen Panopto as their platform for lecture capture, live webcasting, faculty training, and more.

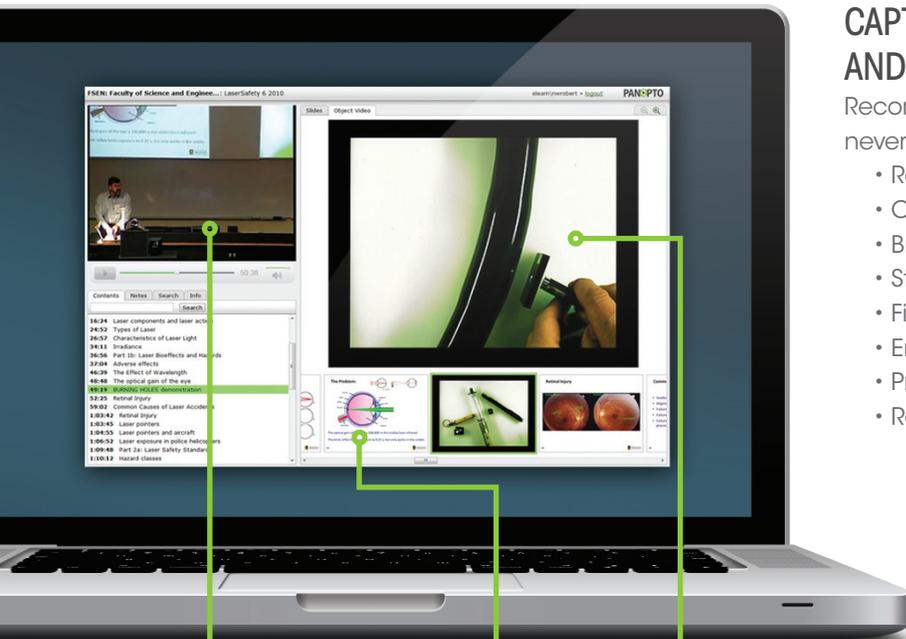

BLENDED LEARNING WITH ROOTS IN EDUCATION

Panopto was founded at Carnegie Mellon University on the idea that video could enhance the learning process for students, faculty, and administration. We built our video platform so that administrators could easily record and manage lectures being delivered in classrooms across campus. We built for faculty wanting to flip their classrooms by recording lessons on their iPhones, iPads, Macbooks, and PCs from home or in the office. And we built for students who expect the ability to watch their lectures on any device, and participate in the learning process by recording their own assignments.

CAPTURE LECTURES, BROADCAST EVENTS, AND MUCH MORE

Recording, editing, viewing, storing, and searching video has never been easier. With Panopto, you can:

- Record course material from your home, office or the field
- Capture complex labs and demos with multi-cam video
- Broadcast events and performances live over the web
- Store all of your lectures in a secure, cloud-hosted library
- Find any word or topic presented during your lectures
- Embed quizzes and live web content in your recordings
- Provide personalized feedback on student assignments
- Remotely proctor take-home exams

Record and webcast video in high definition 1080p.

Find any word presented on slides or mentioned in class.

Add a second video stream to illustrate a new concept.

Playback recordings on any device, anywhere.

View the presenter and their slides with picture-in-picture podcast.
